

## CD/DVD Duplication

Replication of information across several media types can be a hard task to manage, but with Midland Information Resources (MIR) everyone in your distribution network can easily have access to the most accurate information.

While written content may be the traditional way to disseminate information, easy to search CDs or DVDs can be incorporated to gain access to your information as well. By using MIR's cutting edge technology in CD/DVD duplication, everyone from dealers to end users, and anyone in-between can gain access to fully searchable data that includes all additions and updates to your content.

If so please visit, [Matt Forcey's blog Arts and Letters by clicking here.](#)

Here Matt poses a casual, informative conversation around enterprise content management technologies, services, and related issues.

Matt is MIR's specialist in content management and internet business solutions, helping companies employ the appropriate technology and services to achieve process efficiencies and create new revenue channels.

## FAST Search for SharePoint 2010

Capturing and storing information as it is created has increasingly become a must for any size company. Improvements with the new SharePoint 2010 have made it even easier to capture this data and turn it into information to help you with your daily work. But once you capture this vast amount of information what do you do with it? How do you sort through the haystack to find the needle you need?

[Read on to discover how you can put the needle where everyone can see it by incorporating Microsoft's best-of-breed, high-end search solution called FAST....](#)

## Are you in the Cloud?

Did you know that Microsoft's business productivity suite---the most widely used software in the world---is also available in the cloud?

Please join Midland Information Resources (MIR) on September 29th at 11:00 A.M. Central Time for a seminar on "The New Wave of Cloud Services." where we will discuss the advantages of Microsoft Online Services.

Can't make it on the 29th but are still interested in learning more about cloud computing? Still register and we will make sure to get you a recorded version of the presentation.
